

VOCILY. LABS

How one WhatsApp number becomes your entire front desk

A new communication layer for diagnostic labs

— A working demonstration. Live on WhatsApp. —

The problem isn't testing. It's communication.

Your lab does the hard part well — accurate tests, fast turnaround, trusted results. But everything a patient does **before** and **after** the test runs through one place: the phone at your front desk. One person, one line at a time. They can't be on call #3 while they're on call #2. They can't pick up at 11 PM. And every call they miss is a patient who simply dials the next lab.

"What's the price of a thyroid test?"

"I want to book a test / home collection."

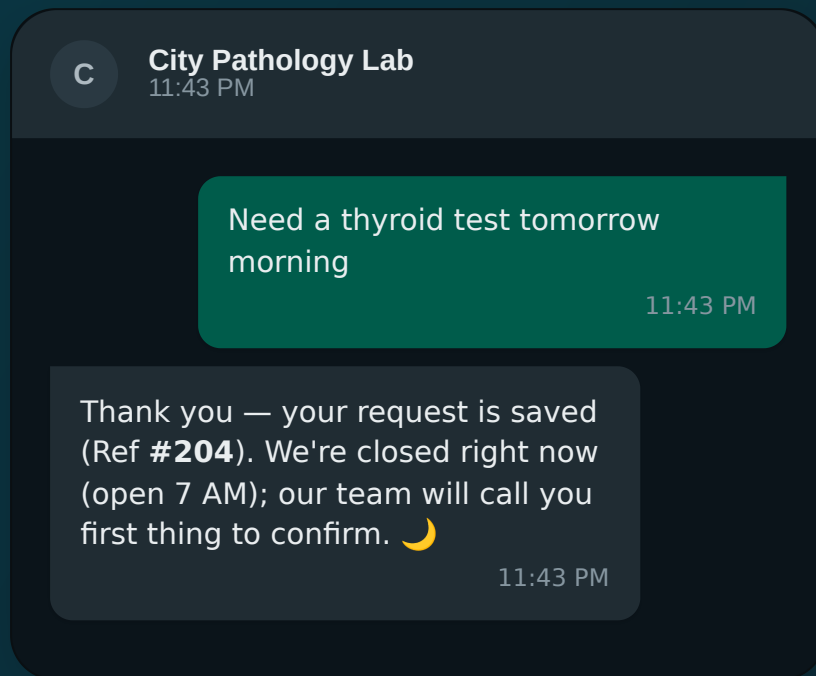

"Is my report ready?"

"What are your timings? Are you open?"

THE MAGIC MOMENT

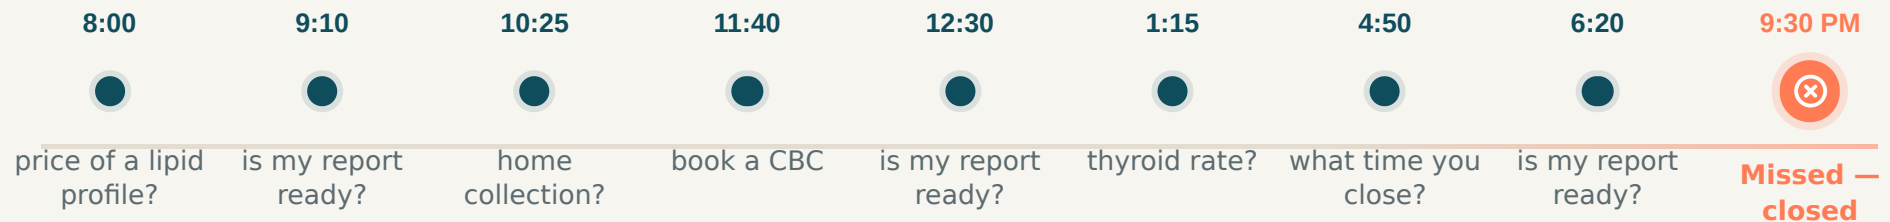

Your front desk just worked while the lab slept.

That's a booking that used to go to whoever opened first. Now it's yours.

🕒 A TYPICAL DAY

The same four questions — on repeat.

Your staff answer the same handful of questions hundreds of times a week. And the calls that come **after hours don't get asked twice** — they go to whichever lab opens first tomorrow.

↗ WHY LABS LOSE REVENUE — EVERY DAY

Do the math on one ordinary Monday.

67

calls came in

12

went unanswered
(busy / after-hours)

5

would've booked a test

₹3,500

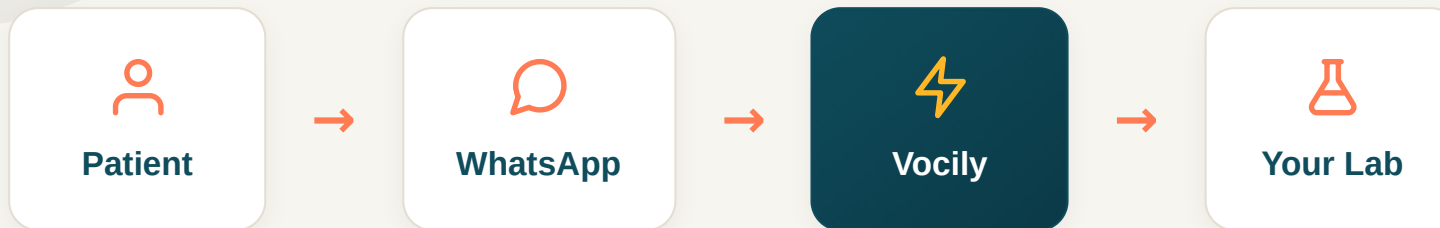

walked out — that day

At one average **₹700** test, that's **₹3,500 gone in a single day** — roughly **₹40,000-60,000 a month**, quietly going to whichever lab picked up.

*Illustrative — tell us your real call volume and we'll do this math live, with **your** numbers.*

✦ INTRODUCING VOCILY

Meet the front desk that never sleeps.

answers prices & timings **books** tokens & home visits **updates** report status **captures** after-hours requests

Patients message the WhatsApp number you already have, in Marathi, Hindi, or English. **No app to download. No portal to log into. Nothing for your staff to learn.** To your patient, it just looks like your lab started replying — 24×7.

From a missed call to a confirmed booking — in four messages.

⊗ BEFORE

- ⊗ Call → busy.
- ⊗ Call again → busy.
- ⊗ Gives up — calls a different lab.

✓ AFTER — ANY HOUR

Your team stops being a switchboard.

BEFORE — ALL DAY

- ⊗ Quote the same prices
- ⊗ Repeat the same timings
- ⊗ Check the same "is it ready yet?"
- ⊗ Take bookings between walk-ins

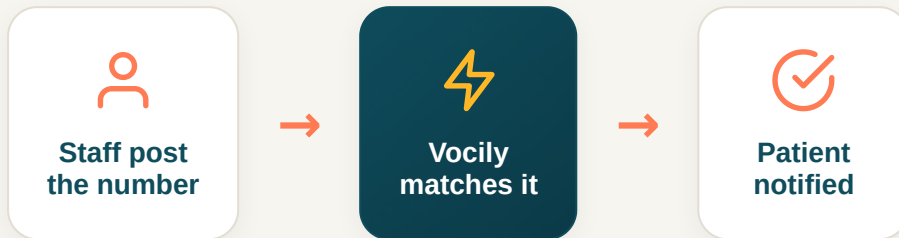

AFTER

- ✓ Care for the patient standing in front of them.

Vocily doesn't replace your front desk. It removes the interruptions — so the people you already pay can do the work only a person can do.

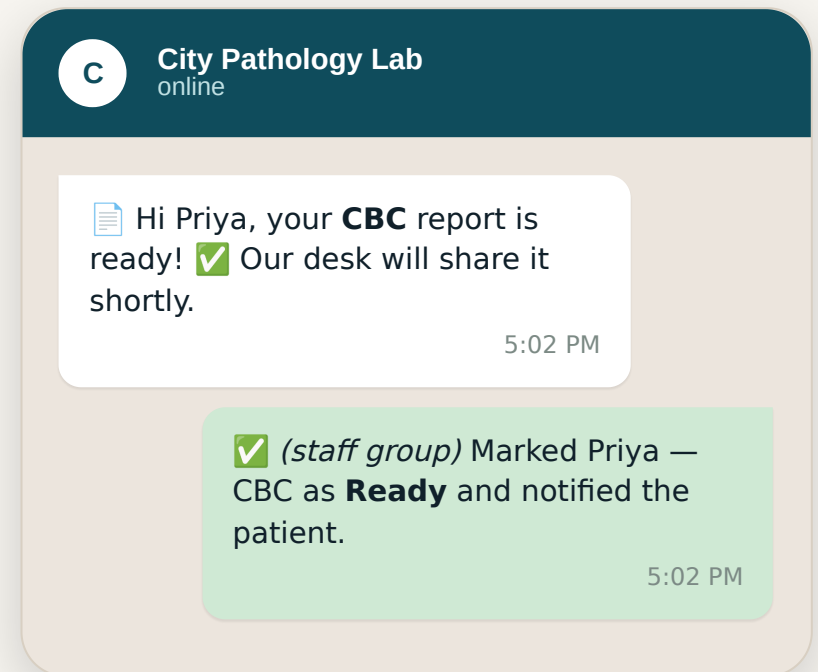

REPORT DELIVERY

The "is my report ready?" call — gone.

When a report is done, your staff post the patient's number into a private staff group. Vocily matches it to the booking and notifies the patient **instantly** — no one at the desk lifts the phone.

*In production, the report **PDF itself** arrives in the patient's chat — securely, inside their own WhatsApp, never as a public link.*

↑ THE RETURN

Cheaper than a fraction of one salary.

A front-desk seat in Aurangabad — and one person still can't cover nights or call #3.

₹14–18k

per month

Vocily runs 24×7, every day, never on a break.

from ₹1,499

per month

Illustrative recovery — even 2-3 missed bookings a day, brought back.

₹40–60k

per month (illustrative)

*We don't guess your ROI — we calculate it **with you**, from your real numbers.*

"Why not just hire another receptionist?"

A new receptionist		Vocily
₹15,000–18,000 / mo	MONTHLY COST	₹1,499 / mo
8 hours a day	WORKING HOURS	24×7
Leave & sick days	TIME OFF	Never
No	NIGHTS & HOLIDAYS	Always on
One at a time	CONVERSATIONS AT ONCE	Unlimited

✓ NO RISK, NO DISRUPTION

Nothing changes — except the chaos.

Your patients

keep using WhatsApp — the app already on their phone.

Your staff

keep using WhatsApp — exactly the way they already do.

Your reports

stay in the lab software you already run.

Vocily simply sits in the middle. No new app. No new software. No staff retraining. No loss of control.

Live in 3 days.

Configure

We load your tests, prices, timings, and branding into the system.

Connect

We connect your WhatsApp and test every flow end-to-end.

Go live

Patients start booking and self-serving. You watch it work.

Nothing to install. Nothing for your staff to learn. We do the setup — you keep doing what you do.

☀ PRICING

Simple, honest pricing.

⚡ STARTER

₹1,499/mo

Booking + reminders + report-ready alerts.

★ MOST LABS PICK THIS

↗ PROFESSIONAL

₹3,499/mo

Everything in Starter, plus price/FAQ answers, report-status self-serve, after-hours capture, and home collection.

🎧 PREMIUM

₹6,000/mo

Everything in Professional, plus an inbound voice receptionist (when ready).

★ Founding offer — the first 10 labs get Professional at just ₹1,499/mo .

Less than a fraction of one ₹14,000–18,000 receptionist. Final pricing confirmed on signup.

Tonight, after your lab closes, patients will still have questions.
Some will need a test. Some will need a report. Some will need home collection.

**The only question is —
will anyone answer them?**
